Pyrosequencing investigation into the bacterial communities in the Qinghai-Tibet Plateau soils associated with soil characteristic factors

Icelandic Agricultural Sciences 33, 56 - 71

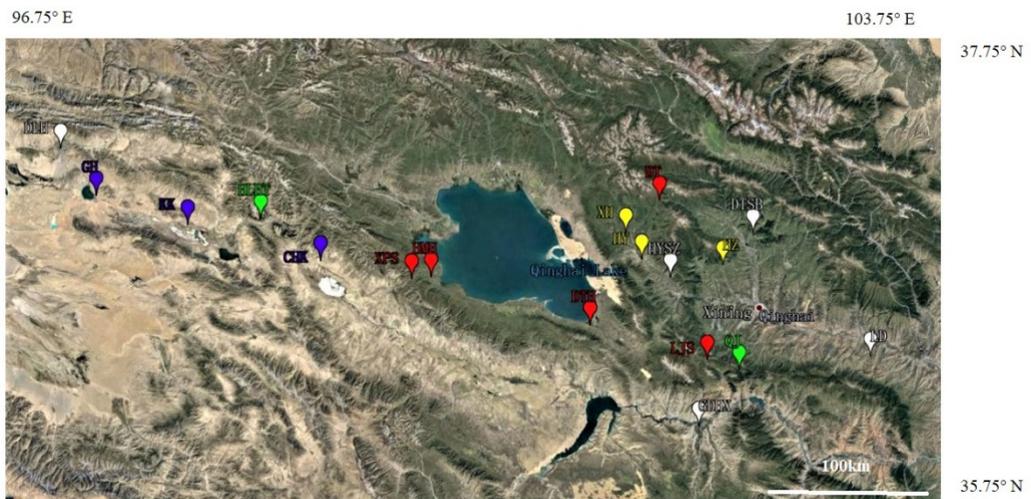

Figure S1 Geographic locations of 18 sampling sites.

GH, KK, and CHK samples are from gray desert soil; DLH, HYSZ, GDHX, DTSB, and LD samples are from castanozems; HLHT and QJ sample are from gray-cinnamon soil; HMH, XPS, DTH, LJS, and DT are from mountain meadow soil; HY, XH, and HZ are from chernozems.
